ENHANCES PRODUCTION
PERFORMANCE
AND REARING QUALITY

This product is designed for newborn animals during the first day of life

ColbiotecVet Start is a combination of unique ingredients designed to boost immunity. It protects newborns in the first hours and days of life and activates the formation of passive immunity.

Colostrum - is considered one of the most important factors determining the health and survival of newborns. It is a concentrated source of immunoglobulins (30% IgG), lactoferrin, growth factors and many other bioactive factors that support the body.

Probiotics - help colonize beneficial intestinal flora. They help colonize the intestinal epithelium with lactic acid bacteria. They displace harmful bacteria and increase the digestibility of nutrients.

Vitamins and minerals - strengthen the body

ACTIVE INGREDIENTS		PROBIOTICS				MINERALS	
Colostrum powder of which - <i>Immunoglobulins</i>		Enterococcus faecium				Selenium
